Acronyms and notes

AAO	Administrative Arrangements Order
AAS	Australian Accounting Standards
AASB	Australian Accounting Standards Board
Agency/entity	Has the same meaning as <i>Commonwealth entity</i> within the <i>Public Governance, Performance and Accountability Act 2013</i>
APS	Australian Public Service
ASL	Average Staffing Level
CRF	Consolidated Revenue Fund
FBO	Final Budget Outcome
Finance Minister	Minister for Finance
GFS	Government Finance Statistics
GGG	General Government Sector
IMF	International Monetary Fund
MoG	machinery of government
PGPA Act	<i>Public Governance, Performance and Accountability Act 2013</i>
SPPs	Specific Purpose Payments

The following notations are used in this Budget Paper:

-	nil estimates of expenditure
na	not applicable (unless otherwise specified)
\$m	millions of dollars
\$b	billions of dollars

Purpose of Budget Paper No. 4

Budget Paper No. 4 presents information on the full allocation of resources across the General Government Sector¹. In 2021-22, agencies² will be responsible for administering approximately \$589.3 billion in expenses to deliver services for individuals, families and businesses.

Budget Paper No. 4 sets out the departmental funding for agencies, administered funding managed by agencies, the nature of those funding sources and the purposes of that funding as defined by Outcome Statements for each agency.

Additionally, information is provided on the staffing resources allocated to agencies delivering services to the Australian community.

-
- 1 The General Government Sector provides public services that are mainly non-market in nature and for the collective consumption of the community, or involve the transfer or distribution of income. These services are largely financed through taxes and other compulsory levies, user charging and external funding (2021-22 Budget, Budget Paper No. 1, Statement 10, Appendix A).
 - 2 For ease of reading, the term 'agency' is used throughout this Preface to refer to non-corporate and corporate Commonwealth entities.

Preface

Throughout the difficult events of the past 15 months the Australian Public Service (APS) has risen to the highest standards of public service. APS staff have proven themselves resilient and flexible, working long hours and reaching across traditional boundaries to deliver essential services to the public.

As Australia continues its recovery from the impact of the COVID-19 pandemic and a range of natural disasters, the Australian Government continues to invest in the capabilities the APS needs to support the Australian community.

Since 2014-15, this Preface has progressively outlined the Government's roadmap for modernising the public sector to deliver better services for all Australians. Previous years of investment in modernising systems and streamlining business practices helped to ensure that the APS had the ability to meet the historic challenges that unfolded following the onset of the COVID-19 pandemic. Those reforms made it possible to transfer staff quickly, support remote working on a large scale, facilitate online collaboration with stakeholders and manage surge in client traffic on Government websites, all while delivering innovative policy interventions at a fast pace.

In 2021-22, the Government will further strengthen the resources and tools of the public service, so it can efficiently deliver the next components of temporary and targeted support for continued economic recovery.

This Preface outlines some of the achievements of the APS in 2020-21 and the Government's plans to further build APS capability across a range of key areas.

Building Recovery, Opportunity and Jobs

In 2021-22, the Government will make necessary investments to grow our economy to deliver the jobs and guarantee the essential services Australians rely on, while keeping Australians safe.

Both government and private investment are essential to recovery and growth. This Budget creates an economic environment in which business is incentivised and encouraged to invest for growth. With this, the Government remains committed to creating opportunities by partnering with the private sector.

Over the last 7 years, investment in Government Business Enterprises of over \$93 billion has accelerated or initiated delivery of vital productivity-improving national infrastructure including the NBN, Inland Rail, Western Sydney Airport, submarine and shipbuilding infrastructure in South Australia, Moorebank Intermodal Terminal and Snowy 2.0. These investments have unlocked \$25 billion of private sector investment,

continued to support job creation, especially in regional Australia, and driven increased economic activity now and into the future.

As part of the Government’s economic recovery and growth strategy, the Government will leverage private capital investment to help deliver our policy priorities. This includes using co-investment funds more widely to attract private capital into nationally important investments. Private partners bring innovation, risk appetite and capability to an investment relationship.

Support for the aviation sector and domestic tourism

The Government’s National Economic Recovery Plan supports tourism operators, businesses, travel agents and airlines who continue to be impacted by COVID-19. This includes the new Tourism Aviation Network Support program to give Australian’s clear incentives to travel to key domestic tourism areas. Providing up to 800,000 half-price airfares is just one example of delivering jobs and investment for the tourism and aviation sectors.

Further support includes:

- A new International Aviation Support program to support Australia’s international passenger airlines to retain flight ready crews and maintain international aircraft in preparation for the return of international travel.
- Support for regular passenger airports to meet their domestic security screening costs.
- A new Aviation Services Assistance Support program to help ground-handling companies meet the costs of mandatory training, certification and accreditation to ensure they maintain their workforces.

This support not only assists the aviation sector but also provides a boost to domestic tourism while international borders remain closed.

Jobs will also be created through Australia’s Technology Investment Roadmap, which is expected to guide \$18 billion of government investment over the next decade, drive at least \$70 billion of total new investment in low emissions technologies and support 130,000 jobs by 2030. As part of the Roadmap, the Government will invest \$1.2 billion over 10 years to incentivise private investment through the creation of a technology co-investment facility focused on developing cleaner energy technologies.

The Government is modernising employment services to be digitally-driven, tailored and flexible through the New Employment Services Model. A package of initiatives will support the national economic recovery by ensuring that job seekers get back to work, disadvantaged job seekers get tailored support and employers' needs are met. As part of this package, in the 2021-22 Budget the Government will invest:

- \$481.2 million over 4 years to ensure more young people aged 15 to 24 have the best opportunity to secure employment by strengthening and continuing the Transition to Work program.
- \$129.8 million over 4 years to provide personalised support to help eligible Australians become self-employed business owners through a streamlined *New Business Assistance with New Enterprise Incentive Scheme* program.

To further support the economic recovery, Government will provide \$213.5 million over 4 years from 2021-22 to expand the Local Jobs Program to 51 employment regions and extend the program for 3 years. The Local Jobs Program supports tailored approaches to accelerate reskilling, upskilling and employment pathways in selected regions, supporting Australia's economic recovery from COVID-19.

The Government recognises Australia's Vocational Education and Training (VET) system will play a critical role in supporting Australia's future growth and prosperity and is investing an additional \$2.7 billion to expand the Building skills for the future — Boosting Apprenticeship Commencements wage subsidy. This will uncap the number of eligible places and increase the duration of the 50 per cent wage subsidy to 12 months. This further support to businesses is expected to generate an estimated 171,000 additional new apprentice and trainee places.

We are backing in the farm sector's ambition of a \$100 billion industry by 2030, through \$850.4 million of initiatives in the agriculture sector over 5 years from 2020-21. A particular focus is on protecting our natural capital from biological threats and giving our farmers the data they need for soil management. This includes protection against pest and disease outbreak through an additional \$67.4 million over 4 years to ensure Australia continues to have a robust biosecurity preparedness and response capability. We will support farmers by building up our data resources on soil quality through providing \$102.0 million over 2 years to enhance data in the National Soil Resources Information System and to incentivise farmers to increase soil testing.

Deregulation

Deregulation is central to the Government's JobMaker plan and the 2021-22 Budget includes \$134.6 million in Deregulation measures. These measures are estimated to deliver to business an average reduction in compliance costs of around \$430 million per year.

Technology is changing how governments can regulate, allowing the digitisation of existing processes and accompanying regulatory streamlining. For example:

- Technological advances will make it easier and cheaper for businesses to get authoritative data so they can comply with their award obligations and gives them greater confidence to hire new employees.
- The new Health Products Portal will provide a single channel for approval of regulated and reimbursed health products and services, reducing costs and compliance time for approximately 400 companies by digitising an estimated 8,000 interactions they have with government each year.
- Reforms to the National Greenhouse and Energy Reporting scheme will likewise streamline reporting for over 900 companies reporting on over 7,500 facilities every year.
- Technological innovation will also support approximately 1,220 commercial fishing operators, by giving them rapid access to data to efficiently plan their operations and help them avoid bycatch and protected species.

The Government has adopted a stewardship approach to regulation, where Ministers, Secretaries and heads of regulators are responsible for portfolio regulatory settings remaining fit-for-purpose. This includes removing regulation if it ceases to be necessary, and streamlining and harmonising regulations across jurisdictions. Departmental Secretaries report twice a year to the Prime Minister on regulatory reform within their portfolios. Another element of the strategy is working across Commonwealth agencies to lift regulator performance, capability and culture, with the Government currently consulting on the refreshed expectations of regulators.

The 2021-22 Budget also includes actions to independently review costs and fees set by regulators under cost-recovery principles, to ensure their efficiency and minimise costs to business.

Preparing Australia for all Forms of Hazard

A fundamental duty of the Government is keeping people safe. The Government has established the National Recovery and Resilience Agency (NRRRA) to deliver long-term natural disaster risk reduction and all hazards relief and recovery. It will also ensure seamless transition from response to relief and recovery following a significant event.

The NRRRA takes public sector disaster management capabilities to the next level, providing expertise and systems suited to managing all forms of natural disasters and emergencies. Previous investments in this area have been targeted to specific types of emergencies such as flood and bushfire recovery, providing the building blocks for the

NRRA. The new agency will support the Australian community to prevent and prepare for natural disasters and respond to all forms of hazard.

The NRRA will merge existing specialist functions to oversee the new Preparing Australia program, a \$615.5 million investment by the Government to mitigate disaster risks before they materialise. It will have a national spread of regionally based staff who will ensure community needs are at the centre of government action. Further practical reforms include changes that implement recommendations from the Royal Commission into National Natural Disaster Arrangements to better prepare Australia for natural disasters and ensure communities receive the support they need when disasters strike.

In addition to the NRRA, the Government will establish the Australian Climate Service (ACS), which will support better prediction of, and planning for, extreme events and a changing climate. The ACS will have the nation's best information and analysis from the Bureau of Meteorology, CSIRO, Geoscience Australia and the Australian Bureau of Statistics. It will work across the Commonwealth and with others to draw on expertise in natural disaster risk reduction, social systems, financial modelling, impact analysis, climate projections and science communication to help respond to crisis events and stress test response and building options. The Government will commit \$209.7 million over 4 years to support the ACS.

These new capabilities will be supported by key enhancements to Emergency Management Australia's operating model. The Government will commit an additional \$90.0 million over 4 years to their important work. The core elements of the changes to the emergency management operating model include:

- Strengthening the Australian Government Crisis Coordination Centre to become the all hazards National Situation Room with improved situational awareness, data and support for decision makers.
- Establishing a national approach to run simulation exercises that regularly test national disaster coordination arrangements.

Rapid response to NSW floods and Tropical Cyclone Seroja

Services Australia’s rapid response to the March 2021 New South Wales floods and Tropical Cyclone Seroja is an example of the support the Government provides to communities in need.

On 21 March 2021, within minutes of the Government activating Government Disaster Relief Payments, Services Australia was ready and helping people in weather and flood-impacted areas in New South Wales through the Australian Government Emergency Information Line. On 14 April 2021, this was expanded to include those impacted by Tropical Cyclone Seroja in Western Australia.

Services Australia mobilised a broad range of resources to assist communities affected by these events. This included upskilling almost 7,000 agency and external APS staff to answer calls and process Australian Government Disaster Recovery Payment and Disaster Recovery Allowance payments. Nearly 400 staff from other APS agencies assisted the response. Services Australia provided face-to-face services in 13 recovery and 11 evacuation centres and assisted more than 6,400 people in affected communities through its mobile servicing arrangements. This included 3 Mobile Service Centres that were diverted to key locations to support the recovery operation. Services Australia social workers were deployed to evacuation centres and have provided vital access to mental health support services, short term counselling, risk and safety assessments and referrals to other support services.

As at 4 May 2021, Services Australia had processed just under 270,000 claims, paid out over \$327 million in assistance and answered 430,000 calls in respect of the New South Wales floods and Tropical Cyclone Seroja. People received their payments rapidly with some people receiving payments in their bank accounts within minutes of applying.

Boosting Digital and Data Capability

Transforming the delivery of government services

Our vision is to ensure Australia’s future as a modern and leading digital economy. This means ensuring the foundations are present to enable economic growth and prosperity, including the infrastructure, systems and regulation to support businesses. It also means delivering simple, secure and trusted essential services and using data as a national asset to better grow the economy and deliver better outcomes for Australians.

In this Budget, the Government continues its long standing commitment to ensure the Australian community has access to high quality public services, when and where they need them. Online government services have guaranteed convenience and, during the

COVID-19 pandemic, have mitigated against the spread of disease by reducing the need for social congregation.

Telehealth

The Government rapidly rolled out telehealth services in March 2020 during COVID-19, so Australians could continue to access GP, medical specialist, mental health, nurse, midwifery and allied health services during lockdowns.

Uptake of telehealth has been strong. From 13 March 2020 to 21 April 2021, over 56 million telehealth services have been delivered to 13.6 million patients by more than 83,000 providers. With almost 25 per cent of COVID-19 telehealth services delivered to rural and regional Australians.

The Government is investing \$204.6 million to extend telehealth until the end of the year, so Australians can continue to access Medicare-subsidised telehealth services, while enhancing integrity safeguards.

Digital technology is changing our economy and society, and how people and businesses interact with government to access essential services. COVID-19 required an accelerated take up of digital technology and we have taken the opportunity to further enhance the delivery of public services.

The Government's Digital Economy Strategy sets out how Australia will strengthen its future as a leading digital economy and society over the years leading to 2030. The Strategy recognises the Government's enabling role in growing the digital economy to deliver better outcomes for all and drive broader transformation through:

- Investing in digital infrastructure, skills, digital trade agreements, cyber security and world class systems and regulations.
- Building capability in emerging technologies.
- Setting digital growth priorities for the economy.

In the 2021-22 Budget, the Government is making new investments for the next evolution of government services including:

- A further \$200.1 million investment in myGov to improve its functionality making it even easier and faster for people to engage with government. This internet portal allows Australians to engage with the Government from a single log-in point through smart and personalised interactions.

- Further investment in My Health Record, which is of particular benefit to older and vulnerable Australians. People with complex health needs are often supported by multiple health professionals, making it important that individual data on health conditions, medicines and care plans are available to the right people. This technology gives people greater control over their data and helps ensure individual needs are understood by health professionals who support them in different settings.

The Government is also ensuring that the Australian community can have confidence their personal information is safe and secure.

Digital Identity

Digital Identity provides a safe and secure way to efficiently access services online, offering people a single place where they can manage their interactions with government from across areas like welfare, education, health and tax.

Digital Identity is one of the most significant technology trends in the world, with major benefits for governments, people and industry. Work has commenced to expand Digital Identity across states, territories and the private sector. It will be a true whole-of-economy solution.

Digital Identity is a voluntary and convenient alternative giving people faster access to the support and services they need. Over 2.3 million people have already seen the value and created a Digital Identity with the Government's identity provider, myGovID. This allows people and businesses to access 75 services easily and securely, including from myGov. Digital identity provides significant opportunities for Australians to not only access government services, but also participate in the digital economy as the system expands.

Cyber and network security

Future measures to improve cyber security and to secure mobile connectivity include:

- Whole-of-government Cyber Hubs to deliver cyber services to an initial group of smaller agencies. This coordinated approach has already commenced and will ensure top cyber talent supports the protection of information across government.
- Ensuring the security of future mobile networks that citizens and businesses depend on for communication and commerce, including 5G and 6G networks. Security will be built into the networks upfront.

The APS was able to provide critical support to the Government during the COVID-19 pandemic response thanks to its existing data capability. The Government is further building Australia's data capability and data-sharing with business and the community to help further grow the economy and to deliver better outcomes for Australians.

The Cyber Security Skills Partnership Innovation fund will be expanded to improve the number of high-skilled cyber security professionals in Australia and additional funding will be provided to secure and build capability across national manufacturing priority sectors. The Next Generation Emerging Technologies Graduates Program will also be established to provide 234 scholarships in emerging technology areas such as robotics, automation, cybersecurity, quantum, blockchain and big data.

Digital Atlas of Australia

The Government's Digital Atlas of Australia is a new measure that helps bring data to life. The Government is spending \$40.2 million over 4 years to develop a national platform to generate dynamic displays of data on an interactive map of Australia. The Digital Atlas will complement existing Geoscience Australia programs like Digital Earth Australia and Positioning Australia. It will enable analysis of geographic regions, and location data to be used to aid responses to emerging issues and priorities. The initial version of the Digital Atlas will be available and accessible to businesses, citizens and governments in late 2022. This resource will assist non-government organisations to target their initiatives and help businesses to identify commercial needs.

More efficient public administration

The Government is committed to increasing the efficiency of the APS to maximise the resources available for delivering services to the Australian community.

The Government is progressively shifting agencies from running their own back-office IT systems for finance and workforce management, towards using standard technology that is delivered through a few dedicated providers (known as Shared Service Provider Hubs). Common APS-wide IT systems save money in the long-run and make it easier for agencies to work together, including when they need to transfer resources to support new policies or responses to emergencies. This will ensure the APS is better positioned to respond to a rapidly changing environment.

The next stage in this journey is to implement and run a whole-of-government enterprise resource planning platform (GovERP). This advanced cyber-secure platform will modernise the technology used for managing accounts, resources and workforce, allowing the APS to focus on delivering outcomes for Australians. When fully implemented, it will support over 90 non-corporate Commonwealth entities and 130,000 public servants and replace disparate, ageing and soon to be obsolete back-office systems.

e-invoicing

The Government has guaranteed that when its suppliers provide e-invoices it will pay them within 5 days or pay interest. In setting this standard, the Government is seeking to drive wider behaviour in the market for payment of suppliers. Significant changes are required to IT systems to adopt e-invoicing and this capability is being rolled out across Commonwealth agencies including through shared service provider hubs. The 5 day payment or interest undertaking will help to improve business cash flow through faster payment times, while reducing transaction costs and handling errors.

Department of Finance (Finance) and Services Australia were the first Commonwealth agencies enabled to receive e-invoices from suppliers. Since 2019, the number of agencies capable of receiving e-invoices has continued to grow with the Australian Taxation Office; Department of Education, Skills and Employment; Australian Charities and Not-for-profits Commission (ACNC); Department of Industry, Science, Energy and Resources; the National Indigenous Australians Agency; the Department of the Prime Minister and Cabinet; the NRRA and the Department of the Treasury now also able to receive e-invoices. A further \$15.3 million will be invested over 3 years from 2021-22 to promote and accelerate the adoption of e-invoicing by business and across all levels of government.

Better and faster processing through automation

In addition to GovERP, the APS continues to explore other ways to use digital capability to boost productivity.

The Productivity and Automation Centre of Excellence (PACE) was established in the Service Delivery Office within Finance in 2017. PACE has automated a number of shared service processes across the financial and human resource operations of client agencies. This has increased efficiency and improved the quality of outputs while reducing costs to those agencies. Process automation has replaced simple, repetitive tasks, allowing staff to focus on higher value work. In 2020, the Service Delivery Office process automations returned over 3,000 hours to business. This time saving has enabled a reinvestment into improving the speed of more complex transactions that require manual input.

PACE built an automation to check if organisations in receipt of grants were registered charities. To do this, PACE worked with the Department of Social Services (DSS) and the ACNC. The automation checked DSS data with the ACNC's Charity Passport data. DSS would otherwise have to do this manually for nearly 70,000 records. The automation led to a reduction in potential manual work by almost 2,300 hours.

Public Service Staffing

The professionalism, skills and commitment of the people who make up the APS are critical to the quality of services upon which Australians rely. These characteristics came to the fore in the COVID-19 pandemic. We always consider first whether there is an opportunity to source talent from within the APS to manage new priorities without compromising other important work.

The Government continues to guarantee the essential services that all Australians rely on and to ensure that the cost and size of the APS reflect the most efficient and effective ways of delivering services. In recent years some of the steady nature of Average Staffing Levels (ASL) have reflected a shift of some services to online, including automation of interactions that have been manual.

As anticipated last year, the Australian Government has entered a phase that requires an uplift in ASL resources and the 2021-22 ASL estimate will increase to 174,276, which is 5,364 above the updated estimate for 2020-21.

In the 2021-22 Budget, the Government is investing in recovery from the COVID-19 pandemic, supporting jobs and improving essential services, including health and

aged care reforms to ensure quality care for vulnerable people. To implement these policy objectives the Government has agreed an uplift in ASL, including:

- ASL increases in the Education, Skills and Employment portfolio to deliver measures to support job creation and growth. This includes the establishment of the New Employment Services Model, which will replace the *jobactive* program and help connect employers with job seekers.
- ASL increases in the Health portfolio to deliver the COVID-19 vaccination program rollout, and to underpin the Government’s response to the Royal Commission into Aged Care Quality and Safety.
- ASL increases to deliver a range of measures to reform the mental health system in response to key recommendations made by the Productivity Commission’s Inquiry into Mental Health.
- ASL increases for DSS to support initiatives to reduce violence against women and children and strengthen programs such as the Cashless Welfare program and the National Redress Scheme.
- ASL increases to help improve the efficiency of veterans’ service delivery, establish and support the Royal Commission into Defence and Veteran Suicide, and support the establishment of the Office of the Special Investigator.
- ASL increases to establish new Commonwealth agencies including the ACS and the NRRRA. These initiatives will help Australia better prepare for and respond to natural disasters by focusing on long-term risk reduction and resilience.

All decisions have been taken in line with the Government’s policy to manage the size of government administration through the careful assessment of the need for additional staff. This includes an ongoing requirement that agencies first inform the Government whether there are opportunities to reprioritise resources from other activities before requesting additional ASL.

Where new activities cannot be undertaken within existing staffing resources, an assessment is made as to whether ASL or other delivery methods are the most appropriate way to deliver policy outcomes. In addition, some uplift in ASL is temporary and will naturally decline when relevant policies cease. This is particularly the case for many COVID-19 response initiatives and other strategies that aim to resolve problems, or reduce them to more manageable levels. ASL increases in the short term reflect major efforts to address an unusual convergence of health, economic and social challenges.

Sustainment of some of this additional ASL will continue to be required over much of the forward estimates. However, recent growth is expected to moderate as the economy

continues to recover and grow, while the continued investment in digital capabilities will support further ASL prioritisation in future years.

In previous economic updates, the Government has used the 2006-07 total ASL levels as a benchmark to assess growth in public sector staffing and facilitate the responsible management of the size of government administration, giving the public transparency about the size of fluctuations or trends. The 2006-07 year was selected as the benchmark year to provide a transparent goal for whole-of-government resource management. That benchmark was also appropriate following the former Government's response to the Global Financial Crisis which produced a spike in ASL. This benchmark has helped the Government ensure that where additional ASL is required, consideration is given to whether it is appropriate to offset material pressures with proportionate reductions elsewhere.

Staffing shifts have helped to ensure that new pressures are managed where possible, using highly skilled and experienced public servants. While the benchmark has applied as a whole-of-government setting, ASL caps have operated only at a portfolio level and have been adjusted up and down for portfolios reflecting pressures and judicious decisions.

Fifteen years downstream from the 2006-07 benchmark, the range and scope of services provided by the Government has grown with the nation. The Government is committed to efficiently resourcing its policies. This includes through the provision of ASL, and partnerships with external providers of specialist services where that is more effective to meet contemporary challenges, as well as the Government's guarantee of quality programs. This has helped to ensure that its public sector workforce remains structured for maximum efficiency and productivity. So too, the methodical ASL assessment and management processes, including caps on ASL in portfolios, will continue to form an important part of the Government's ASL policy as it transitions toward the next phase of its workforce-planning approach.

As a product of continued deliberate workforce planning, it is expected that over the medium and longer term there will be modest underlying ASL growth as Australia recovers its equilibrium and gets back to normal rates of economic and population growth.

In keeping with the dynamic nature of the policy environment over recent Budget updates and reflecting the careful decisions of Government, the departmental funding provided to administer government services has increased in 2021-22. In large part this reflects the increase in scope of service delivery. However, as a proportion of government expenditure, departmental allocations continue to be lower than the average over the prior decade.

Graph 1: Departmental expenses as a percentage of total government expenses

- (a) Expenses data (both total expenses and departmental expenses) represent General Government Sector expenses only.
- (b) Expenses data from 2007-08 through to 2020-21 is derived from Final Budget Outcome statements (FBO). From 2021-22 onwards, expenses data reflects revised budget and forward estimates as at the 2021-22 Budget.
- (c) Excludes Defence and the National Disability Insurance Agency.

APS capability

The Government is building APS workforce capability and expertise by investing in professional skills and developing the workforce and leaders needed today and into the future.

APS Surge Reserve

Building on the COVID-19 response and recognising the value of a whole-of-APS workforce response in a crisis, a permanent APS Surge Reserve has now been established. It provides the Government with an ongoing capacity to mobilise large numbers of APS members quickly in a crisis. As at March 2021, more than 2,000 members of the APS had nominated for the APS Surge Reserve. The APS Surge Reserve adds to, rather than replaces, other arrangements such as internal surge pools, profession-specific arrangements and temporary registers. For example, according to the 2020 APS Employee Census, more than 11,000 employees worked in a different team and over 2,500 employees worked in a different agency to support the COVID-19 response.

To meet the expectations of the Government and the Australian community, it is a fundamental requirement that all members of the APS have the contemporary skills and experiences needed to operate in a complex and dynamic environment.

The Government continues to invest in, and support, the uplift of APS skills.

APS Academy

The APS Academy will commence operations in July 2021, and contribute to the Government’s APS reform agenda to build a world-class APS. Establishing the APS Academy represents a significant shift in the APS approach to the professional training and development of its staff. The APS Academy will build networks with academic institutions and expert practitioners on public sector governance to deliver courses covering foundational to advanced skills. The APS Academy will develop public service capabilities across a wide range of topics including: policy analysis, program implementation and delivery, leadership and engagement with stakeholders, to serve the elected Government and safeguarding the integrity of the public sector. It will focus on formal courses as well as self-directed and on-the-job learning.

The APS has formalised its recognition of 3 professional ‘streams’. In each of the 3 areas there will be targeted training and mentoring to lift in-house expertise, provide mobility and foster rewarding public service careers. The 3 streams focus on the data profession, digital profession and the human resources profession. Further effort will be made in future years to lift capability in other professional fields through the APS Academy and the APS professions model.

APS Data Professional Stream Strategy

A Data Professional Stream network was established in late 2020 and now has over 1,200 members. A specialist data graduate recruitment campaign commenced in 2020, and is expanding in 2021 as part of the Australian Government Graduate Program. Initiatives under the 2 year work program of the Data Professional Stream will focus on building sophisticated and specialised capabilities to define the skills and training required for data professionals.

APS Digital Professional Stream Strategy

The APS Digital Professional Stream was launched in April 2020 and has almost 1,500 members. The Digital Profession is delivering a range of programs to attract new talent into the APS and provide training and career development opportunities for existing staff. It also aims to support women as they develop their digital careers. The Strategy includes:

- A career pathways framework, that maps the skills needed to succeed in 150 digital roles.
- Emerging talent programs that attract graduates, cadets and apprentices into the APS.
- The Government’s first Digital Summit, with over 700 attendees from across government, industry and academia.
- The Women in IT Executive Mentoring program, to lift representation of women in digital leadership roles.
- A new capability development model that is creating a cycle of continuous learning, based on career pathways, on-the-job coaching and change leadership.

APS Human Resources Professional Stream Strategy

In 2020, the Human Resources (HR) Professional Stream developed:

- A professional HR network that shares expertise, including delivering 9 events that were recognised by the Australian Human Resources Institute as Continuing Professional Development, to its network of 2,900 members.
- A Mental Health Hotline, launched during COVID-19, to support APS HR professionals.
- A streamlined HR graduate recruitment process involving one application and selection process with successful candidates being allocated to agencies rather than multiple selection processes.
- The inclusion of HR strategists on selection panels for key senior HR roles.
- Written guidance on identification and development of HR standards and capabilities that was published and circulated to the profession.

The Australian Public Service Workforce Strategy 2025, released in March 2021, focuses on a one enterprise approach to support a flexible APS workforce, which can be mobilised where it is needed. The Strategy recognises that people – and the capabilities they bring – are key assets in delivering for the Government and the Australian people.

The Strategy is built around the APS being a single enterprise and highlights 3 areas of focus through to 2025:

- Recruiting and developing the capabilities and skills needed so the APS has depth in specialist areas and multidiscipline leaders.
- Embracing data, technology and flexible and responsive workforce models to deploy skills, expertise and talent to where it is needed to deliver the outcomes the Government and Australians expect.
- Strengthening integrity and purposeful leadership to shape behaviour that is distinguished by its integrity and grasp of citizen needs.

The Strategy also includes support for diversity in the APS. This includes:

- The Commonwealth Aboriginal and Torres Strait Islander Workforce Strategy 2020–24. Indigenous Australians make up approximately 3.1 per cent of the Australian working age population and 3.4 per cent of the APS. The Strategy sets a number of targets to further increase Indigenous employment outcomes across the APS, including contributing to annual Closing the Gap reporting targets. Our priorities include supporting the career advancement of Indigenous Australians, including in leadership roles.
- The Australian Public Service Disability Employment Strategy 2020–25. Continuing the momentum from the previous APS disability employment strategy, this new Strategy has a number of actions under 2 focus areas: attract, recruit and retain more people with disability; and improve accessibility and inclusivity of APS workplace cultures and environments. The Strategy introduced a 7 per cent employment target for people with disability in the APS by 2025. Further progress is needed, but in the year to 31 December 2020 there was an increase of 179 employees with disability to 5,929 employees in total.
- The Gender Equality Strategy 2021–26 which aims to embed recent gains that have been made towards gender equality in the APS, particularly for women in leadership roles. The Strategy will help drive an inclusive culture that creates an environment of safety, flexibility and innovation for all employees.

There is research demonstrating that gender-balanced leadership leads to improved decision-making and performance. The Government is committed to supporting more women into leadership positions in the public and private sectors. In 2016, the Government committed to targets for women holding 50 per cent of Australian Government Board positions overall and 40 per cent of positions on each board. At 31 December 2020, a record 49.5 per cent of positions on Australian Government Boards were filled by women. This compares with only 32.9 per cent of women on ASX200 company boards.

The overall proportion of women in the APS reached 59.9 per cent at December 2020. Women have attained, and in most cases exceeded, parity with men at every level up to and including Executive Level 1. In addition, the proportion of female SES employees has increased from 40 per cent in 2014 to 49 per cent in 2020, with women reaching parity (50.5 per cent) with men at the SES Band 1 classification for the first time in December 2020.

The representation of male and female employees at the highest APS classification levels is moving towards parity and this is reflected in a reduced gender pay gap across the APS. The gender pay gap has been reducing across the APS in recent years from 9.1 per cent in 2015 to 7.3 per cent in 2019. The Government's commitment to mandatory

reporting for the APS to the Workplace Gender Equality Agency will strengthen reporting and benchmarking against the private sector on the gender pay gap.

While there is still more work to do, these strategies have helped increase the diversity of the APS workforce and will continue to shape the development of the APS.

A Fit for Purpose Public Sector

A productive, connected and professional APS is critical to support the Government to meet its commitment to deliver quality services and outcomes for Australians. While recent events like drought, bushfires, a health pandemic and floods have caused upheaval to communities, businesses and households, the APS has done its best to help people through their challenges. As the social and economic recovery from the COVID-19 pandemic continues, the APS will be at the forefront of delivering the Government's agenda.

We honour the resilience of the Australian people by investing in the talent and systems of the APS so it can deliver reliable services and implement new policy decisively. Economic recovery is not just about winding back restrictions as health conditions permit, but also about public investment in the infrastructure, technologies and datasets that businesses need to seize opportunities and create jobs.

The Government trusts the APS as a partner in policy development, helping find practical solutions and broker reforms in complex areas. The Government is committed to ensuring the APS remains world-class, works collaboratively both internally and with specialists in the non-government sector, and is supported by the tools and resources it requires to continue to deliver for all Australians.

Senator the Hon Simon Birmingham

Minister for Finance

Introduction and Guide to Budget Paper No. 4

The purpose of Budget Paper No. 4 is to provide a whole-of-government view of estimated resourcing managed in the Budget year and previous year by agencies (which are non-corporate Commonwealth entities, corporate Commonwealth entities and Commonwealth companies) in the General Government Sector (GGS). The resources include financial resources, staff resources, expenses and net capital investment.

The Budget Papers do not authorise appropriations or impose legal obligations on the Commonwealth.

Budget Paper No. 4 contains three main parts and an appendix with tables of information as follows:

Part 1 Agency Financial Resourcing

- 1.1 Agency Resourcing Table
- 1.2 Special Appropriations Table
- 1.3 Special Accounts Table

Part 2 Staffing of Agencies

Part 3 Expenses and Net Capital Investment

- 3.1 Departmental Expenses Table
- 3.2 Net Capital Investment Table

Appendix A: Agency Outcome Statements

The Agency Financial Resourcing tables present appropriation information by portfolio and then by agency. Estimated resourcing shown is presented on a cash basis for both the Budget year and previous year (which is printed below the Budget year in italics, or to the left of the Budget year in a separate column). The tables include agencies, Outcomes, special appropriations and special accounts, and estimates of annual appropriations and external revenue for the 2020-21 and 2021-22 years.

Estimates contained in the Budget Papers incorporate assumptions and judgements based on the best information available at the time of publication.

Transfer of resourcing between agencies

Agencies may, over the course of a financial year, transfer amounts of resourcing to other agencies, as a result of restructuring, legislative changes, Executive decisions and machinery of government changes enacted by amendments to the Administrative Arrangements Order (AAO). Resourcing, at the date of change and afterwards, is reflected against the agency that gains the resources. Resourcing prior to the date of change is reflected against the agency that formerly managed the resources.

Supply Acts and annual Appropriation Bills

Throughout Budget Paper No. 4, references to annual appropriations and Appropriation Bills for 2020-21 should be taken to include both the relevant Supply Acts¹ and Appropriation Acts.²

Annual appropriation amounts appearing for 2020-21 include the following Appropriation Acts:

- *Supply Act (No. 1) 2020-2021*
- *Supply Act (No. 2) 2020-2021*
- *Supply (Parliamentary Departments) Act (No. 1) 2020-2021*
- *Appropriation Act (No. 1) 2020-2021*
- *Appropriation Act (No. 2) 2020-2021*
- *Appropriation (Parliamentary Departments) Act (No. 1) 2020-2021.*

1 The 2020-2021 *Supply Acts* provide funding for the ongoing business of government for 2020-21. Funding provided was broadly equivalent to 7/12ths of most agencies' 2020-21 annual appropriation estimates. To support the Government's response to COVID 19, some agencies received proportions greater than 7/12ths.

2 The 2020-21 *Appropriation Acts* provided the remaining 5/12ths of most agencies' 2020-21 annual appropriation estimates as well as measures.

Guide to Resourcing Tables

Linkages between tables and amounts presented in Budget Paper No. 4 are illustrated in Figures 1 to 4. A consolidated view of financial resources to be managed by agencies is presented in the Agency Resourcing Table. Amounts in the Agency Resourcing Table can be matched with information in the:

- annual Appropriation Bills
- Special Appropriations Table
- Special Accounts Table.

Figures 1 and 2 show how amounts in the Agency Resourcing Table can be matched with amounts in the annual Appropriations Bills. The Figures also highlight amounts in these Bills for non-operating expenditure and for payments to the States, Territories and local governments.

Figures 3 and 4 show how amounts in the Agency Resourcing Table can be matched with amounts in the Special Appropriations Table and the Special Accounts Table.

Part 1: Agency Financial Resourcing

Part 1: Agency Financial Resourcing

Appropriations Framework

An appropriation is a legal entitlement to draw money (cash) from the Consolidated Revenue Fund (CRF). Appropriations are either annual appropriations or special appropriations. Annual appropriations are contained in the annual Appropriation Acts. Special appropriations are contained in other Acts.

The CRF is a concept established in section 81 of the Australian Constitution to represent all Commonwealth money. All revenues or moneys raised or received by the Executive Government of the Commonwealth, or any person or organisation acting on behalf of the Commonwealth, automatically form part of the CRF. This includes for example taxes, charges, levies, borrowings, loan repayments and moneys held on behalf of or in trust. Money automatically forms part of the CRF upon receipt, regardless of whether the money is deposited in a bank account.

Section 83 of the Constitution provides that no money shall be drawn from the Treasury of the Commonwealth except under an appropriation made by law (the 'Treasury' of the Commonwealth equates to the CRF). Section 81 provides that appropriations from the CRF must be applied for expenditure of the Commonwealth. Together, sections 81 and 83 provide that before money may be spent there must be an appropriation, made by law, for the purposes of the Commonwealth. These requirements for an appropriations framework safeguard the constitutional control by the Parliament over Australian Government spending.

The appropriations and expenditure framework for agencies in the Australian Government is based on the accounting concept of control. Where an agency has substantial control, the related appropriation and expenditure is classified as *departmental* and where an agency does not have control, expenditure is classified as *administered*. This classification is unique to government and is not used elsewhere in the Australian economy. It is currently reflected in Australian Accounting Standard AASB 1050 *Administered Items*. Whether an agency has *administered* or *departmental* control over resources is based largely on the level of discretion the agency has in using those resources.

Departmental appropriations are available to meet expenditure over which an agency has substantial control and are typically used for agency operational expenditure, such as for employees and supplier expenses. *Administered* appropriations are administered by an agency on behalf of the government for the benefit of, or payment to, parties who are external to the agency and not part of the internal operations of that agency. Administered appropriations are typically used for expenditure such as government grants, subsidies and obligations that arise from legislated eligibility rules and

conditions. Further information on the appropriations framework can be found on the Finance website.

Machinery of Government Changes

The term ‘machinery of government changes’ (MoG changes) describes a variety of organisational or functional changes affecting the Commonwealth. MoG changes often arise from amendments to the Administrative Arrangements Order (AAO) following a Prime Ministerial decision to abolish or create a department or to move functional responsibilities between agencies.

Since the 2020-21 Budget, there have been a number of AAO amendments and other Government decisions with the following transfer of functions:

- Transfer of responsibility for the coordination of youth affairs from the Department of Health to the Department of Education, Skills and Employment
- Transfer of the administration of business registry functions from the Australian Securities and Investment Commission to the Australian Taxation Office
- Consolidation of the functions of the National Bushfire Response Agency and the National Drought and North Queensland Flood Response Agency into the new National Recovery and Resilience Agency
- Transfer of the disaster risk reduction, disaster recovery and some preparedness functions from the Department of Home Affairs and the Rural Financial Counselling Service programs from the Department of Agriculture, Water and the Environment to the new National Recovery and Resilience Agency
- Transfer of drought coordination and oversight functions from the National Drought and North Queensland Flood Response Agency to the Department of Agriculture, Water and the Environment
- Transfer of small business policy and programs functions from the Department of Industry, Science, Energy and Resources to the Department of the Treasury
- Consolidation of the functions of the Infrastructure and Project Financing Agency within the Department of the Treasury
- Transfer of the Digital Transformation Agency from the Social Services portfolio to the Prime Minister and Cabinet portfolio
- Transfer of Consumer Data Right rules and sector assessment functions from the Australian Competition and Consumer Commission to the Department of the Treasury

- Transfer of the Data Standards Body function from the Commonwealth Scientific and Industrial Research Organisation to the Department of the Treasury.

The following entities were renamed as a result of an order of the Governor-General or legislative amendments:

As at 6 October 2020	As at 11 May 2021
National Drought and North Queensland Flood Response and Recovery Agency	National Recovery and Resilience Agency

The AAO documents and further information on AAOs can be found on the Department of the Prime Minister and Cabinet website, or on the Federal Register of Legislation.

For information on how MoG changes impact on portfolios, refer to the *2020-21 Portfolio Additional Estimates Statements* and *2021-22 Portfolio Budget Statements* of relevant portfolios.

Advance to the Finance Minister in response to COVID-19

The Advance to the Finance Minister (AFM) provisions under the annual Appropriation Acts enable urgently required allocations to be issued to entities during the year. Allocations are made through a Determination by the Minister for Finance up to a statutory limit in the annual Appropriation Acts. Given the unique and evolving nature of the COVID-19 pandemic and the associated uncertainty around the Government's necessary response, Parliament supported extraordinary AFM provisions in 2019-20 and 2020-21.

In 2019-20, \$1,974 million was allocated from total AFM provisions of \$42,975 million across *Appropriation Acts 2019-20* (Nos. 1 to 6) and *Appropriation (Coronavirus Economic Response Package) Acts 2019-20* (Nos. 1 and 2).

In 2020-21, AFM provisions of \$40,000 million were enacted across *Supply Acts 2020-21* (Nos. 1 and 2), reduced by the value of AFMs issued under *Appropriation Acts 2019-20* (Nos. 5 and 6) (\$91.5 million). Accordingly, the balance available for allocation from *Supply Acts 2020-21* (Nos. 1 and 2) on 1 July 2020 was \$39,908.5 million. As at 4 December 2020, \$1,904.3 million had been issued under *Supply Acts 2020-21* (Nos. 1 and 2).

On 4 December 2020 *Appropriation Acts 2020-21* (Nos. 1 and 2) commenced, which reduced the AFM provisions to \$10,000 million for the remainder of 2020-21. No further allocations can be made under *Supply Acts 2020-21* (Nos. 1 and 2). To date, one allocation for \$475.8 million has been made from *Appropriation Acts 2020-21*.

For the Appropriation Bills 2021-22 (Nos. 1 and 2), the AFM provisions have been further reduced to \$5 billion for 2021-22. The 2021-22 AFM provisions constitute a further reduction closer towards normal levels of contingency, while allowing some buffer for continued ongoing uncertainty around the Government's necessary response to the COVID-19 pandemic.

Table 1: AFMs issued in 2020-21 to 11 May 2021

AFM No.	Appropriation source	Entity	Purpose	Allocation Date	Amount (\$m)
1	<i>Supply Act (No. 2) 2020-2021</i>	Department of Infrastructure, Transport, Regional Development and Communications	Provide funding to local governments for delivery of local roads and community infrastructure projects to boost economic activity following the initial impact of COVID-19	2/07/2020	250.0
2	<i>Supply Act (No. 1) 2020-2021</i>	Australian Trade and Investment Commission	Extension of the International Freight Assistance Mechanism	24/08/2020	230.1
3	<i>Supply Act (No. 1) 2020-2021</i>	Department of Health	Supply and production of COVID-19 vaccines	28/09/2020	808.8
4	<i>Supply Act (No. 2) 2020-2021</i>	Department of Health	Purchase of PPE and other essential medical supplies and equipment for the National Medical Stockpile	30/09/2020	384.1
5	<i>Supply Act (No. 1) 2020-2021</i>	Department of Infrastructure, Transport, Regional Development and Communications	Provide funding to support the Domestic Aviation Network Support program	25/11/2020	71.7
6	<i>Supply Act (No. 1) 2020-2021</i>	Department of Social Services	Provide funding to support not-for-profit organisations	26/11/2020	159.7
7	<i>Appropriation Act (No. 1) 2020-21</i>	Department of Infrastructure, Transport, Regional Development and Communications	Provide funding to support the aviation sector	12/04/2021	475.8
Total AFMs issued in 2020-21					2,380.2

Further information on AFMs issued in prior years can be found on the Finance website.

Agency Resourcing Table

Overview of the Agency Resourcing Table

The Agency Resourcing Table presents a consolidated view of estimated Commonwealth public sector financial resources, which will be managed in the Budget year by agencies, that is, Commonwealth entities and Commonwealth companies subject to the *Public Governance, Performance and Accountability Act 2013*¹. The Agency Resourcing Table is organised by portfolio and agency, and by agency Outcome². Corporate Commonwealth entities are denoted by a * in the Agency Resourcing Table and Commonwealth companies are denoted by a #.

The Agency Resourcing Table differentiates the sources of funding, which are annual Appropriation Bills, External Revenue, Special Appropriations and Special Accounts. The amounts are classified into *departmental* and *administered* resourcing, except for special accounts, which can be classified as either or both. The Agency Resourcing Table includes inter-governmental transactions, which occur when one agency in the GGS pays another agency in the GGS for goods and/or services. To eliminate inter-governmental transactions would not accurately represent the financial resources managed by a particular agency.

Amounts in the Agency Resourcing Table can be matched with amounts in the annual Appropriation Bills, Special Appropriations Table and Special Accounts Table. Examples are in Figures 1 to 4 of the section entitled *Guide to Resourcing Tables*.

Appropriations for corporate entities, shown as *administered* in the annual Appropriation Bills, are regarded as *departmental* funding when received by the corporate entities. This is consistent with accounting and reporting requirements and shown as such in the Agency Resourcing Table.

The column headed *External Revenue* in the Agency Resourcing Table presents income received from sources that are not appropriated by Parliament to the agency, including amounts received from other government agencies, individuals, and non-government bodies. In large part, these amounts are for the provision of services.

-
- 1 The total amounts in the Agency Resourcing Table cannot be used to calculate consolidated Commonwealth financial resources. This is because they do not include Public Financial Corporations, Public Non Financial Corporations and the Australian National University. These are public corporations that typically operate in the commercial sphere, are not in the GGS, and are mostly self funded. Further information on the nature and classification of agencies can be found in the *Flipchart of PGPA Act Commonwealth entities and companies*, which is available on the Finance website.
 - 2 The text of the approved Outcomes which apply to each agency is set out at *Appendix A: Agency Outcome Statements*.

The column headed Special Accounts in the Agency Resourcing Table shows estimated amounts to be credited to one or more special accounts. This column presents estimated income expected from other government agencies, individuals and non-government bodies. This column is located between the *departmental* and *administered* sides of the Agency Resourcing Table because depending on the legislated purposes of a special account, the resources may be used for *departmental* and/or *administered* expenditure. It is consistent with amounts presented in the *Receipts (non-appropriated)* column of the Special Accounts Table.

Special Capital Appropriations are now reported as *Special Appropriations* by outcome in the Agency Resourcing Table, and also against the relevant Acts in the Special Appropriations Table.

The Agency Resourcing Table includes only those special appropriations and special accounts that have been established in law at the time of publication. The Agency Resourcing Table and Special Accounts Table exclude moneys held by an agency on trust for a person other than the Commonwealth. These amounts are not considered resourcing available to the agency, as they are not held on account of the Commonwealth and are not for the use or benefit of the Commonwealth.

(b) Amounts credited to a special account that were not appropriated to the entity by an annual Appropriation Act or another Act.

(c) Includes *New Administered Outcomes* and *Administered Assets and Liabilities items*, within the meaning of Appropriation Bill No.2.

(d) The National Disability Insurance Scheme Launch Transition Agency, also known as the National Disability Insurance Agency (NDIA), is a corporate Commonwealth entity and as such is not required to report expenses separately as *administered* or *departmental*. However, the NDIA's expenses incurred in the provision of reasonable and necessary support to clients (*administered* in nature) will be significant over the forward estimates compared to other corporate Commonwealth entities. These expenses are jointly funded by the Commonwealth and participating States and Territories and reflected as Departmental External Revenue. All agency operational costs (*departmental* in nature) are funded by the Commonwealth through the Appropriation Bills. Table 3.1: Departmental Expenses Table also shows the split between NDIA expenses that are *departmental* or *administered* in nature and provides a total excluding NDIA expenses that are *administered* in nature.

(a) Receipts that were not appropriated to the entity by an annual Appropriation Act or another Act. Excludes amounts credited to a special account.
 (b) Amounts credited to a special account that were not appropriated to the entity by an annual Appropriation Act or another Act.
 (c) Includes *New Administered Outcomes* and *Administered Assets and Liabilities items*, within the meaning of Appropriation Bill No.2.
 (d) Functions transferred to the Department of the Treasury on 1 May 2021.

Special Appropriations Table

Overview of the Special Appropriations Table

The Special Appropriations Table lists Acts that contain one or more special appropriations. Acts are listed by portfolio and responsible agency, consistent with the most recent AAO.

Special appropriations are those appropriations contained in Acts other than the annual Appropriation Acts. Special appropriations account for more than three quarters of total GGS expenditure.

Special appropriations can be limited or unlimited in terms of amount or time. A small number of Acts may also stipulate a maximum amount appropriated for the particular purpose. Expenditure funded by a special appropriation is often triggered by legislative eligibility criteria and conditions. An example of expenditure that is met using a special appropriation is aged pensions paid under the *Social Security (Administration) Act 1999*.

The Summary of Special Appropriations Table presents total portfolio resourcing that is supported by special appropriations. Only those special appropriations that have been established in law at the time of publication are included in the Special Appropriations Table and Summary of Special Appropriations Table.

The detailed Special Appropriations Table presents estimated resourcing required for each agency by Act that is supported by special appropriations. For each agency, the aggregated total for all Acts in the Special Appropriations Table can be matched with the total *Special Appropriation* amount in the Agency Resourcing Table. For an example of this matching, see Figure 3 of the *Guide to Resourcing Tables* section. Where no resourcing is expected to be required during the Budget or comparator year, the relevant Acts have not been included in the Special Appropriations Table.

A complete list of Acts with provisions containing special appropriations can be found in the *Chart of Special Appropriations*, which is available on the Finance website.

Summary of Special Appropriations Table

Portfolio	Estimated Actual 2020-2021	Budget Estimate 2021-2022
	(\$'000)	(\$'000)
Agriculture, Water and the Environment	1,124,811	1,022,783

Special Accounts Table

Overview of the Special Accounts Table

A special account is an appropriation mechanism that sets aside an amount within the CRF for specific expenditure purposes. Special accounts can be used to appropriate for expenditure that is resourced from contributions from other parties, such as other governments, contributions from industry or members of the community. Special accounts can also be credited with amounts from annual appropriations and special appropriations (including other special accounts), if those amounts were appropriated for the same purpose as the special account. Special accounts can be credited with amounts held on trust – these amounts are not shown in the Special Accounts Table, as they are not considered resourcing available to the agency.

The Summary of Special Accounts Table presents total portfolio resourcing that is expected to be provided by other agencies, individuals and non-government bodies.

The Special Accounts Table lists special accounts by portfolio and responsible agency. For each special account, the Special Accounts Table shows the estimated opening balance for the Budget and comparator years, estimated cash inflows and outflows (receipts and payments) during the year, and estimated closing balance at the end of the Budget and comparator years. Estimated resources for the comparator year are printed in italics. Where responsibility for managing a special account is moved between agencies during the year, the part year impact for each agency is shown.

The column headed *Receipts (Non-Appropriated)* shows estimated amounts to be credited to a special account, which are received from other agencies, individuals, and non-government bodies. The column headed *Receipts (Appropriated)* shows amounts estimated to be credited to a special account, which are appropriated to the agency in an annual Appropriation Act or another Act containing a special appropriation (including other special accounts).

Amounts for an agency in the Special Accounts Table column headed *Receipts (Non-Appropriated)* can be matched with the Agency Resourcing Table column headed *Special Accounts*. Amounts in the Special Accounts Table column headed *Receipts (Appropriated)* are included in the Agency Resourcing Table in the column(s) headed *Appropriation Bill No. 1, Appropriation Bill No. 2* and/or *Special Appropriation*. Further detail on matching amounts between these two tables is in Figure 4 of the Guide to Resourcing Tables section.

Special accounts which had no balance, receipts or payments during the Budget or comparator years are not included in the Special Accounts Table. A list of current special accounts can be found in the *Chart of Special Accounts*, which is available on the Finance website.

Summary of Special Accounts Table

Portfolio	Estimated Actual Receipts	Budget Estimate Receipts
	(Non-Appropriated) 2020-2021	(Non-Appropriated) 2021-2022

Part 2: Staffing of Agencies

Estimates of Average Staffing Levels of Agencies in the Australian General Government Sector

This Part reports on Average Staffing Levels (ASL) at the portfolio and agency level. Estimates are presented for the current year (2020-21) and the Budget year (2021-22).

Commentary on the staffing profile for the General Government Sector and the Government's policy is presented in the *Preface* of Budget Paper No. 4.

The tables below include estimates of ASL provided by General Government Sector agencies. ASL figures reflect the average number of employees receiving salary or wages over the financial year, with adjustments for casual and part-time staff to show the full time equivalent. It also includes uniformed staff and overseas personnel. The ASL figures exclude contractors. Any minor discrepancies in totals are due to rounding of partial ASL.

Table 2.1: Estimates of ASL of agencies in the Australian Government General Government Sector

Agriculture, Water and the Environment		
	2020-21 ASL	2021-22 ASL
Department of Agriculture, Water and the Environment	6,079	6,221
Australian Fisheries Management Authority	154	177
Australian Pesticides and Veterinary Medicines Authority	180	187
Bureau of Meteorology	1,562	1,620
Cotton Research and Development Corporation	15	15
Director of National Parks	324	322
Fisheries Research and Development Corporation	19	17
Grains Research and Development Corporation	79	79
Great Barrier Reef Marine Park Authority	238	240
Murray-Darling Basin Authority	266	271
Regional Investment Corporation	69	62
Rural Industries Research and Development Corporation	22	25
Sydney Harbour Federation Trust	60	63
Wine Australia	53	53
Total	9,119	9,351

Attorney-General's		
	2020-21 ASL	2021-22 ASL
Attorney-General's Department	1,705	1,837
Administrative Appeals Tribunal	606	628
Asbestos Safety and Eradication Agency	12	16
Australian Building and Construction Commission	162	162
Australian Commission for Law Enforcement Integrity	64	110
Australian Financial Security Authority	435	462
Australian Human Rights Commission	136	127
Australian Law Reform Commission	11	10
Comcare	585	630
Commonwealth Integrity Commission (a)	0	0
Fair Work Commission	329	350
Fair Work Ombudsman and the Registered Organisations Commission	819	852
Federal Court of Australia	1,079	1,258
High Court of Australia	73	76

2019-20	166,762	80,540	247,302
2020-21	168,912	81,671	250,583
2021-22	174,276	82,858	257,134

(a) The estimates of ASL reflect expected outcomes at the time the Budget Papers were published. The ASL levels realised by entities are generally published in Annual Reports and may differ from these initial estimates.

Part 3: Expenses and Net Capital Investment

Part 3: Expenses and Net Capital Investment

This Part reports on departmental expenses and net capital investment, by agency. The data are presented on the same basis as data in Statement 6 of Budget Paper No. 1. Both sets of data are presented on the basis of external accounting and financial reporting standards. These standards present information in terms of accrued expenses and accrued revenue.

The external standards used for budget reporting purposes are:

- the Australian Bureau of Statistics' (ABS) accrual Government Finance Statistics (GFS) publication, *Australian System of Government Finance Statistics: Concepts, Sources and Methods, 2015* (cat no. 5514.0), which is based on the International Monetary Fund (IMF) accrual GFS framework
- the Australian Accounting Standards (AAS), issued by the Australian Accounting Standards Board (AASB), which includes International Financial Reporting Standards as adopted in Australia for use by the not-for-profit sector and specific standards such as AASB 1049 *Whole of Government and General Government Sector Financial Reporting* (AASB 1049).

Machinery of government changes have implications for how information is presented in the tables in this Part. For example, if an agency was abolished in a particular year, it will have estimated expenses reflecting expenditure in part of that year. If an agency was created in a particular year, it will have estimated expenses for both that year and the out years.

Departmental Expenses Table

Table 3.1 presents departmental expenses by agency. Departmental expenses reduce the net worth of agencies. It includes expenses controlled by agencies such as payment of wages and purchases of goods and services. It excludes administered expenses – not controlled by agencies – paid on behalf of government such as social benefits and grants to the States. It also excludes net capital investment, which does not reduce net worth.

Total departmental expenses	99,292	104,619	105,024	106,047	111,086
Less: NDIA administered in nature(c)	23,323	26,487	28,257	29,425	31,884
Total excluding NDIA administered in nature	75,969	78,133	76,767	76,622	79,202

(a) Estimates of inter-agency transactions are included in the whole-of-government and inter-agency amounts. The entry for each portfolio does not include eliminations for inter-agency transactions within that portfolio.

(b) Agency estimates include net write down and impairment of assets and fair value losses. For Australian government reporting these are considered other economic flows.

(c) The National Disability Insurance Scheme Launch Transition Agency (also known as the National Disability Insurance Agency, NDIA) is a corporate Commonwealth entity and as such is not required to report expenses separately as *administered* or *departmental*. However, the NDIA's expenses incurred in the provision of reasonable and necessary support to clients (*administered* in nature) will be significant over the forward estimates compared to other corporate Commonwealth entities. Additionally, these expenses are jointly funded by the Commonwealth and participating states and territories. To provide a better view of these NDIA expenses, Table 3.1 shows the split between expenses that are *departmental* or *administered* in nature and provides a total excluding NDIA that are *administered* in nature.

Net Capital Investment Table

Table 3.2 presents net capital investment by agency. Net capital investment represents net expenditure by agencies on non-financial assets. It includes expenditure on assets such as defence equipment. It excludes any investment in financial assets such as loans.

(a) Estimates of inter-agency transactions are included in the whole-of-government and inter-agency amounts. The entry for each portfolio does not include eliminations for inter-agency transactions within that portfolio.

(b) Agency estimates include net write-down and impairment of non-financial assets and assets recognised for the first time. For Australian government reporting these are considered other economic flows.

Appendix A: Agency Outcome Statements

This appendix provides a table of the Outcomes managed by each agency. It assists users to understand the Agency Resourcing Table.

The Outcome statements are listed by portfolio, in the order of: portfolio department(s) of state, corporate Commonwealth entities (*) and Commonwealth companies (#), and then other agencies. Within these categories, agencies are listed alphabetically by official name. This is the same order as displayed in the annual Appropriation Bills and the Agency Resourcing Table.

Outcome statements articulate Government objectives and serve three main purposes:

- to explain the purposes for which annual appropriations are approved by the Parliament for use by agencies
- to provide a basis for budgeting and reporting against the use of funds
- to measure and assess non-financial performance in contributing to Government policy objectives.

This appendix contains approved Outcome statements for GGS agencies. It does not include agencies that are not within the GGS, such as Public Financial Corporations or Public Non-Financial Corporations.

Further information on the nature and structure of these agencies can be found in the *Flipchart of PGPA Act Commonwealth entities and companies*, which is available on the Finance website.

Agency Outcome Statements

Parliament		
Entity	Outcome	Description
Department of the Senate	1	Advisory and administrative support services to enable the Senate and Senators to fulfil their representative and legislative duties.
Department of the House of Representatives	1	Advisory and administrative services support the House of Representatives to fulfil its representative and legislative role.
Department of Parliamentary Services	1	Support the functions of Parliament and parliamentarians through the provision of professional services, advice and facilities and maintain Australian Parliament House.
Parliamentary Budget Office	1	Inform the Parliament by providing independent and non-partisan analysis of the budget cycle, fiscal policy and the financial implications of proposals.

Agriculture, Water and the Environment		
Entity	Outcome	Description
Department of Agriculture, Water and the Environment	1	Conserve, protect and sustainably manage Australia's biodiversity, ecosystems, environment and heritage through research, information management, supporting natural resource management, establishing and managing Commonwealth protected areas, and reducing and regulating the use of pollutants and hazardous substances, and coordination of climate change adaptation strategy and climate change science activities.
Department of Agriculture, Water and the Environment	2	Advance Australia's strategic, scientific, environmental and economic interests in the Antarctic region by protecting, administering and researching the region.
Department of Agriculture, Water and the Environment	3	More sustainable, productive, internationally competitive and profitable Australian agricultural, food and fibre industries through policies and initiatives that promote better resource management practices, innovation, self-reliance and improved access to international markets.
Department of Agriculture, Water and the Environment	4	Safeguard Australia's animal and plant health status to maintain overseas markets and protect the economy and environment from the impact of exotic pests and diseases, through risk assessment, inspection and certification, and the implementation of emergency response arrangements for Australian agricultural, food and fibre industries.
Department of Agriculture, Water and the Environment	5	Improve the health of rivers and freshwater ecosystems and water use efficiency through implementing water reforms, and ensuring enhanced sustainability, efficiency and productivity in the management and use of water resources.
Australian Pesticides and Veterinary Medicines Authority*	1	Protection of the health and safety of people, animals, the environment, and agricultural and livestock industries through regulation of pesticides and veterinary medicines.
Cotton Research and Development Corporation*	1	Adoption of innovation that leads to increased productivity, competitiveness and environmental sustainability through investment in research and development that benefits the Australian cotton industry and the wider community.

Agriculture, Water and the Environment		
Entity	Outcome	Description
Director of National Parks*	1	Management of Commonwealth reserves as outstanding natural places that enhance Australia's well-being through the protection and conservation of their natural and cultural values, supporting the aspirations of Aboriginal and Torres Strait Islander people in managing their traditional land and sea country, and offering world class natural and cultural visitor experiences.
Fisheries Research and Development Corporation*	1	Increased economic, social and environmental benefits for Australian fishing and aquaculture, and the wider community, by investing in knowledge, innovation, and marketing.
Grains Research and Development Corporation*	1	New information and products that enhance the productivity, competitiveness and environmental sustainability of Australian grain growers and benefit the industry and wider community, through planning, managing and implementing investments in grains research and development.
Murray-Darling Basin Authority*	1	Equitable and sustainable use of the Murray-Darling Basin by governments and the community including through development and implementation of a Basin Plan, operation of the River Murray system, shared natural resource management programs, research, information and advice.
Regional Investment Corporation*	1	Encourage growth, investment and resilience in Australian farm businesses and rural and regional communities by delivering the Commonwealth's farm business concessional loans.
Rural Industries Research and Development Corporation*	1	Increased knowledge that fosters sustainable, productive and profitable new and existing rural industries and furthers understanding of national rural issues through research and development in government-industry partnership.
Sydney Harbour Federation Trust*	1	Enhanced appreciation and understanding of the natural and cultural values of Sydney for all visitors, through the remediation, conservation and adaptive re-use of, and access to, Trust lands on Sydney Harbour.
Wine Australia*	1	Foster and enable a competitive Australian wine industry by investing in research and development, building markets, disseminating knowledge and ensuring compliance.
Australian Fisheries Management Authority	1	Ecologically sustainable and economically efficient Commonwealth fisheries, through understanding and monitoring Australia's marine living resources and regulating and monitoring commercial fishing, including domestic licensing and deterrence of illegal foreign fishing.
Bureau of Meteorology	1	Enabling a safe, prosperous, secure and healthy Australia through the provision of weather, water, climate and ocean services.
Great Barrier Reef Marine Park Authority	1	The long-term protection, ecologically sustainable use, understanding and enjoyment of the Great Barrier Reef for all Australians and the international community, through the care and development of the Marine Park.

Attorney-General's		
Entity	Outcome	Description
Attorney-General's Department	1	A just and secure society through the maintenance and improvement of Australia's law, justice, security and integrity frameworks.
Attorney-General's Department	2	Facilitate jobs growth through policies and programs that promote fair, productive and safe workplaces.
Australian Human Rights Commission*	1	An Australian society in which human rights are respected, protected and promoted through independent investigation and resolution of complaints, education and research to promote and eliminate discrimination, and monitoring, and reporting on human rights.
Comcare*	1	Promote and enable safe and healthy work.
Administrative Appeals Tribunal	1	Provide correct or preferable decisions through a mechanism of independent review of administrative decisions that is accessible, fair, just, economical, informal, quick and proportionate.
Asbestos Safety and Eradication Agency	1	Assist in the prevention of exposure to asbestos fibres and the elimination of asbestos-related disease in Australia through implementing the National Strategic Plan for Asbestos Awareness and Management in Australia.
Australian Building and Construction Commission	1	Enforce workplace relations laws in the building and construction industry and ensure compliance with those laws by all participants in the building and construction industry through the provision of education, assistance and advice.
Australian Commission for Law Enforcement Integrity	1	Independent assurance to the Australian Government that Commonwealth law enforcement agencies and their staff act with integrity by detecting, investigating and preventing corruption.
Australian Financial Security Authority	1	Maintain confidence in Australia's personal insolvency and personal property securities systems by delivering fair, efficient and effective regulatory, trustee, registry and information services.
Australian Law Reform Commission	1	Informed government decisions about the development, reform and harmonisation of Australian laws and related processes through research, analysis, reports and community consultation and education.
Fair Work Commission	1	Simple, fair and flexible workplace relations for employees and employers through the exercise of powers to set and vary minimum wages and modern awards, facilitate collective bargaining, approve agreements and deal with disputes.
Fair Work Ombudsman and Registered Organisations Commission	1	Compliance with workplace relations legislation by employees and employers through advice, education and where necessary enforcement.
Fair Work Ombudsman and Registered Organisations Commission	2	Effective governance and financial transparency of registered employee and employer organisations, through regulation, investigation and appropriate enforcement action.
Federal Court of Australia	1	Apply and uphold the rule of law for litigants in the Federal Court of Australia and parties in the National Native Title Tribunal through the resolution of matters according to law and through the effective management of the administrative affairs of the Court and Tribunal.

Attorney-General's		
Entity	Outcome	Description
Federal Court of Australia	2	Apply and uphold the rule of law for litigants in the Family Court of Australia through the resolution of family law matters according to law, particularly more complex family law matters, and through the effective management of the administrative affairs of the Court.
Federal Court of Australia	3	Apply and uphold the rule of law for litigants in the Federal Circuit Court of Australia through more informal and streamlined resolution of family law and general federal law matters according to law, through the encouragement of appropriate dispute resolution processes and through the effective management of the administrative affairs of the Court.
Federal Court of Australia	4	Improved administration and support of the resolution of matters according to law for litigants in the Federal Court of Australia, the Family Court of Australia and the Federal Circuit Court of Australia, and parties in the National Native Title Tribunal, through efficient and effective provision of shared corporate and registry services.
High Court of Australia	1	To interpret and uphold the Australian Constitution and perform the functions of the ultimate appellate Court in Australia.
National Archives of Australia	1	To promote the creation, management and preservation of authentic, reliable and usable Commonwealth records and to facilitate Australians' access to the archival resources of the Commonwealth.
Office of the Australian Information Commissioner	1	Provision of public access to Commonwealth Government information, protection of individuals' personal information, and performance of information commissioner, freedom of information and privacy functions.
Office of the Commonwealth Ombudsman	1	Fair and accountable administrative action by Australian Government entities and prescribed private sector organisations, by investigating complaints, reviewing administrative action and statutory compliance inspections and reporting.
Office of the Director of Public Prosecutions	1	Contribute to a fair, safe and just society by delivering an effective, independent prosecution service in accordance with the Prosecution Policy of the Commonwealth.
Office of the Inspector-General of Intelligence and Security	1	Independent assurance for the Prime Minister, senior ministers and Parliament as to whether Australia's intelligence and security agencies act legally and with propriety by inspecting, inquiring into and reporting on their activities.
Office of Parliamentary Counsel	1	A body of Commonwealth laws and instruments that give effect to intended policy, and that are coherent, readable and readily accessible, through the drafting and publication of those laws and instruments.
Safe Work Australia	1	Healthier, safer and more productive workplaces through improvements to Australian work health and safety and workers' compensation arrangements.
Seafarers Safety, Rehabilitation and Compensation Authority	1	Safe and healthy workplaces, and cost effective and fair compensation.

Defence		
Entity	Outcome	Description
Department of Defence	1	Defend Australia and its national interests through the conduct of operations and provision of support for the Australian community and civilian authorities in accordance with Government direction.
Department of Defence	2	Protect and advance Australia's strategic interests through the provision of strategic policy, the development, delivery and sustainment of military, intelligence and enabling capabilities, and the promotion of regional and global security and stability as directed by Government.
Defence Housing Australia*	1	To contribute to the Defence outcome by providing total housing services that meet Defence operational and client needs through a strong customer and business focus.
Australian Signals Directorate	1	Defend Australia from global threats and advance our national interests through the provision of foreign signals intelligence, cyber security and offensive cyber operations, as directed by Government.
Department of Veterans' Affairs	1	Maintain and enhance the financial wellbeing and self-sufficiency of eligible persons and their dependants through access to income support, compensation, and other support services, including advice and information about entitlements.
Department of Veterans' Affairs	2	Maintain and enhance the physical wellbeing and quality of life of eligible persons and their dependants through health and other care services that promote early intervention, prevention and treatment, including advice and information about health service entitlements.
Department of Veterans' Affairs	3	Acknowledgement and commemoration of those who served Australia and its allies in wars, conflicts and peace operations through promoting recognition of service and sacrifice, preservation of Australia's wartime heritage, and official commemorations.
Australian War Memorial*	1	Australians remembering, interpreting and understanding the Australian experience of war and its enduring impact through maintaining and developing the national memorial, its collection and exhibition of historical material, commemorative ceremonies and research.

Education, Skills and Employment		
Entity	Outcome	Description
Department of Education, Skills and Employment	1	Improved early learning, schooling, student educational outcomes and transitions to and from school through access to quality child care, support, parent engagement, quality teaching and learning environments.
Department of Education, Skills and Employment	2	Promote growth in economic productivity and social wellbeing through access to quality higher education, international education, and international quality research, skills and training.
Department of Education, Skills and Employment	3	Promote growth in economic productivity and social wellbeing through access to quality skills and training.
Department of Education, Skills and Employment	4	Foster a productive and competitive labour market through policies and programs that assist job seekers into work and meet employer needs.

Education, Skills and Employment		
Entity	Outcome	Description
Australian Curriculum, Assessment and Reporting Authority*	1	Improved quality and consistency of school education in Australia through a national curriculum, national assessment, data collection, and performance reporting system.
Australian Institute for Teaching and School Leadership Limited#	1	Enhance the quality of teaching and school leadership through developing standards, recognising teaching excellence, providing professional development opportunities, and supporting the teaching profession.
Australian Research Council	1	Growth of knowledge and innovation through managing research funding schemes, measuring research excellence and providing advice.
Australian Skills Quality Authority	1	Through our regulation and partnership with stakeholders, ensure quality vocational education and training so that students, employers, the community and governments have confidence in the integrity of national qualifications issued by training providers.
Tertiary Education Quality and Standards Agency	1	Contribute to a high quality higher education sector through streamlined and nationally consistent higher education regulatory arrangements; registration of higher education providers; accreditation of higher education courses; and investigation, quality assurance and dissemination of higher education standards and performance.

Finance		
Entity	Outcome	Description
Department of Finance	1	Support sustainable Australian Government finances through providing high quality policy advice and operational support to the government and Commonwealth entities to maintain effective and efficient use of public resources.
Department of Finance	2	Support an efficient and high-performing public sector through providing leadership to Commonwealth entities in ongoing improvements to public sector governance, including through systems, frameworks, policy, advice and service delivery.
Department of Finance	3	Support for Parliamentarians and others as required by the Australian Government through the delivery of, and advice on, work expenses and allowances, entitlements and targeted programs.
Commonwealth Superannuation Corporation*	1	Retirement and insurance benefits for scheme members and beneficiaries, including past, present and future employees of the Australian Government and other eligible employers and members of the Australian Defence Force, through investment and administration of their superannuation funds and schemes.
Australian Electoral Commission	1	Maintain an impartial and independent electoral system for eligible voters through active electoral roll management, efficient delivery of polling services, and targeted education and public awareness programs.

Finance		
Entity	Outcome	Description
Future Fund Management Agency	1	Strengthen the Commonwealth's financial position for the benefit of the Australian people, by managing the investment activities of the Future Fund and certain other Australian Government investment funds in line with their Investment Mandates.
Independent Parliamentary Expenses Authority	1	Support for current and former Parliamentarians and others as required by the Australian Government through the delivery of, independent oversight and advice on, work resources and travel resources.

Foreign Affairs and Trade		
Entity	Outcome	Description
Department of Foreign Affairs and Trade	1	The advancement of Australia's international strategic, security and economic interests including through bilateral, regional and multilateral engagement on Australian Government foreign, trade and international development policy priorities.
Department of Foreign Affairs and Trade	2	The protection and welfare of Australians abroad and access to secure international travel documentation through timely and responsive travel advice and consular and passport services in Australia and overseas.
Department of Foreign Affairs and Trade	3	A secure Australian Government presence overseas through the provision of security services and information and communications technology infrastructure, and the management of the Commonwealth's overseas property estate.
Tourism Australia*	1	Grow demand and foster a competitive and sustainable Australian tourism industry through partnership marketing to targeted global consumers in key markets.
Australian Centre for International Agricultural Research	1	To achieve more productive and sustainable agricultural systems for the benefit of developing countries and Australia through international agricultural research and training partnerships.
Australian Secret Intelligence Service	1	Enhanced understanding for the Government of the overseas environment affecting Australia's interests through the provision of covert intelligence services about the capabilities, intentions or activities of people or organisations outside Australia.
Australian Trade and Investment Commission	1	Contribute to Australia's economic prosperity by promoting Australia's export and other international economic interests through the provision of information, advice and services to business, associations, institutions and government.
Australian Trade and Investment Commission	2	The protection and welfare of Australians abroad through timely and responsive consular and passport services in specific locations overseas.

Health		
Entity	Outcome	Description
Department of Health	1	Better equip Australia to meet current and future health needs of all Australians through the delivery of evidence-based health policies; improved access to comprehensive and coordinated health care; ensuring sustainable funding for health services, research and technologies; and protecting the health and safety of the Australian community.
Department of Health	2	Ensuring improved access for all Australians to cost-effective and affordable medicines, medical, dental and hearing services; improved choice in healthcare services, through guaranteeing Medicare and the Pharmaceutical Benefits Scheme; supporting targeted assistance strategies and private health insurance.
Department of Health	3	Improved wellbeing for senior Australians through targeted support, access to appropriate, high quality care, and related information services.
Department of Health	4	Improved opportunities for community participation in sport and recreation, excellence in high-performance athletes, and protecting the integrity of sport through investment in sport infrastructure, coordination of Commonwealth involvement in major sporting events, and research and international cooperation on sport issues.
Australian Commission on Safety and Quality in Health Care*	1	Improved safety and quality in health care across the health system, including through the development, support for implementation, and monitoring of national clinical safety and quality guidelines and standards.
Australian Digital Health Agency*	1	To deliver national digital healthcare systems to enable and support improvement in health outcomes for Australians.
Australian Institute of Health and Welfare*	1	A robust evidence-base for the health, housing and community sectors, including through developing and disseminating comparable health and welfare information and statistics.
Australian Sports Commission*	1	Increased participation in organised sport and continued international sporting success including through leadership and development of a cohesive and effective sports sector, provision of targeted financial support, and the operation of the Australian Institute of Sport.
Australian Sports Foundation Limited#	1	Improved Australian sporting infrastructure through assisting eligible organisations to raise funds for registered sporting projects.
Food Standards Australia New Zealand*	1	A safe food supply and well-informed consumers in Australia and New Zealand, including through the development of food regulatory measures and the promotion of their consistent implementation, coordination of food recall activities and the monitoring of consumer and industry food practices.
Independent Hospital Pricing Authority*	1	Promote improved efficiency in, and access to, public hospital services primarily through setting efficient national prices and levels of block funding for hospital activities.
Aged Care Quality and Safety Commission	1	Protect and enhance the safety, health, wellbeing and quality of life of aged care consumers, including through effective engagement with them, regulation and education of Commonwealth-funded aged care service providers and resolution of aged care complaints.

Health		
Entity	Outcome	Description
Australian Organ and Tissue Donation and Transplantation Authority	1	Improved access to organ and tissue transplants, including through a nationally coordinated and consistent approach and system.
Australian Radiation Protection and Nuclear Safety Agency	1	Protection of people and the environment through radiation protection and nuclear safety research, policy, advice, codes, standards, services and regulation.
Cancer Australia	1	Minimised impacts of cancer, including through national leadership in cancer control with targeted research and clinical trials; evidence informed clinical practice; strengthened national data capacity; community and consumer information and support.
National Blood Authority	1	Access to a secure supply of safe and affordable blood products, including through national supply arrangements and coordination of best practice standards within agreed funding policies under the national blood arrangements.
National Health Funding Body	1	Improve transparency of public hospital funding in Australia by supporting the obligations and responsibilities of the Administrator of the National Health Funding Pool through best practice administration of public hospital funding.
National Health and Medical Research Council	1	Improved health and medical knowledge, including through funding research, translating research findings into evidence-based clinical practice, administering legislation governing research, issuing guidelines and advice for ethics in health and the promotion of public health.
National Mental Health Commission	1	Provide expert advice to the Australian Government and cross-sectoral leadership on the policy, programs, services and systems that support mental health in Australia, including through administering the Annual National Report Card on Mental Health and Suicide Prevention, undertaking performance monitoring and reporting, and engaging consumers and carers.
Professional Services Review	1	A reduction of the risks to patients and costs to the Australian Government of inappropriate practice, including through investigating health services claimed under the Medicare and Pharmaceutical benefits schemes.
Sport Integrity Australia	1	Protection of the integrity of Australian sport and the health and welfare of those who participate in sport through the coordination of a national approach to all sports integrity matters.

Home Affairs		
Entity	Outcome	Description
Department of Home Affairs	1	Protect Australia from national security and criminal threats through effective national coordination, policy and strategy development, emergency management, and regional cooperation.
Department of Home Affairs	2	Support a prosperous and united Australia through effective coordination and delivery of immigration and social cohesion policies and programs.

Home Affairs		
Entity	Outcome	Description
Department of Home Affairs	3	Advance a prosperous and secure Australia through trade and travel facilitation and modernisation, and effective customs, immigration, maritime and enforcement activities across the border continuum.
Australian Criminal Intelligence Commission	1	To protect Australia from criminal threats through coordinating a strategic response and the collection, assessment and dissemination of intelligence and policing information.
Australian Federal Police	1	Reduce criminal and national security threats to Australia's collective economic and societal interests through cooperative national and international policing services, primarily focused on the prevention, detection, disruption, investigation and prosecution of criminal activity.
Australian Federal Police	2	A safe and secure environment through policing activities on behalf of the Australian Capital Territory Government.
Australian Federal Police	3	Safeguarding Australians and Australian interests through the delivery of policing services primarily focused on protective services, aviation policing and international missions.
Australian Institute of Criminology	1	Informed crime and justice policy and practice in Australia by undertaking, funding and disseminating policy-relevant research of national significance.
Australian Security Intelligence Organisation	1	To protect Australia, its people and its interests from threats to security through intelligence collection, assessment and advice to Government.
Australian Transaction Reports and Analysis Centre	1	The protection of the financial system from criminal abuse through actionable financial intelligence, risk-based regulation, and collaboration with domestic and international partners.
Office of the Special Investigator	1	Ensure Australian law and principles of justice are upheld through investigating activities of Australian Defence Force personnel in Afghanistan from 2005 to 2016, and referring alleged criminal offences including breaches of the Laws of Armed Conflict for prosecution.

Industry, Science, Energy and Resources		
Entity	Outcome	Description
Department of Industry, Science, Energy and Resources	1	Support economic growth, productivity and job creation for all Australians by investing in science, technology and commercialisation, growing innovative and competitive businesses, industries and regions, and supporting resources and northern Australia.
Department of Industry, Science, Energy and Resources	2	Reduce Australia's greenhouse gas emissions, contribute to effective global action on climate change, and support technological innovation in clean and renewable energy, through developing and implementing a national response to climate change.
Department of Industry, Science, Energy and Resources	3	Support the affordable, reliable, secure and competitive operation of energy markets for the long term benefit of the Australian community through improving Australia's energy supply, efficiency, quality, performance and productivity.

Industry, Science, Energy and Resources		
Entity	Outcome	Description
Australian Institute of Marine Science*	1	Growth of knowledge to support protection and sustainable development of Australia's marine resources through innovative marine science and technology.
Australian Nuclear Science and Technology Organisation*	1	Improved knowledge, innovative capacity and healthcare through nuclear-based facilities, research, training, products, services and advice to Government, industry, the education sector and the Australian population.
Australian Renewable Energy Agency*	1	Support improvements in the competitiveness of renewable energy and related technologies and the supply of renewable energy by administering financial assistance, developing analysis and advice about, and sharing information and knowledge with regard to, renewable energy and related technologies.
Clean Energy Finance Corporation*	1	Facilitate increased flows of finance into Australia's clean energy sector, applying commercial rigour to investing in renewable energy, low-emissions and energy efficiency technologies, building industry capacity, and disseminating information to industry stakeholders.
Commonwealth Scientific and Industrial Research Organisation*	1	Innovative scientific and technology solutions to national challenges and opportunities to benefit industry, the environment and the community, through scientific research and capability development, services and advice.
National Offshore Petroleum Safety Environmental Management Authority*	1	Promote and enforce the effective management of risks to the workforce, the environment and the structural integrity of facilities, wells and well-related equipment of the Australian offshore petroleum and greenhouse gas storage industries through regulatory oversight.
Northern Australia Infrastructure Facility*	1	Enable economic growth in northern Australia, by facilitating private sector investment in economic infrastructure through the provision of concessional financing delivered through the State and Territory Governments.
Clean Energy Regulator	1	Contribute to a reduction in Australia's net greenhouse gas emissions, including through the administration of market based mechanisms that incentivise reduction in emissions and the promotion of additional renewable electricity generation.
Climate Change Authority	1	Provide expert advice to the Australian Government on climate change mitigation initiatives, including through conducting regular and specifically commissioned reviews and through undertaking climate change research.
Geoscience Australia	1	Informed government, industry and community decisions on the economic, social and environmental management of the nation's natural resources through enabling access to geoscientific and spatial information.
IP Australia	1	Increased innovation, investment and trade in Australia, and by Australians overseas, through the administration of the registrable intellectual property rights system, promoting public awareness and industry engagement, and advising government.

Infrastructure, Transport, Regional Development and Communications		
Entity	Outcome	Description
Department of Infrastructure, Transport, Regional Development and Communications	1	Improved infrastructure across Australia through investment in and coordination of transport and other infrastructure.
Department of Infrastructure, Transport, Regional Development and Communications	2	An efficient, sustainable, competitive, safe and secure transport system for all transport users through regulation, financial assistance and safety investigations.
Department of Infrastructure, Transport, Regional Development and Communications	3	Strengthening the sustainability, capacity and diversity of Australia's cities and regions including through facilitating local partnerships between all levels of government and local communities; through investment in water infrastructure and measures that stimulate economic growth; and providing grants and financial assistance.
Department of Infrastructure, Transport, Regional Development and Communications	4	Good governance and service delivery in the Australian territories including through the maintenance and improvement of the laws and services for non-self-governing territories, and the overarching legislative framework for self-governing territories.
Department of Infrastructure, Transport, Regional Development and Communications	5	Promote an innovative and competitive communications sector, through policy development, advice and program delivery, so all Australians can realise the full potential of digital technologies and communications services.
Department of Infrastructure, Transport, Regional Development and Communications	6	Participation in, and access to, Australia's arts and culture through developing and supporting cultural expression.
Australia Council*	1	Supporting Australian artists and arts organisations to create and present excellent art that is accessed by audiences across Australia and abroad.
Australian Broadcasting Corporation*	1	Informed, educated and entertained audiences — throughout Australia and overseas — through innovative and comprehensive media and related services.
Australian Film, Television and Radio School*	1	Support the development of a professional screen arts and broadcast culture in Australia including through the provision of specialist industry-focused education, training, and research.
Australian Maritime Safety Authority*	1	Minimise the risk of shipping incidents and pollution in Australian waters through ship safety and environment protection regulation and services and maximise people saved from maritime and aviation incidents through search and rescue coordination.
Australian National Maritime Museum*	1	Increased knowledge, appreciation and enjoyment of Australia's maritime heritage by managing the National Maritime Collection and staging programs, exhibitions and events.
Creative Partnerships Australia Ltd#	1	A cultural environment that enriches the lives of all Australians.
Civil Aviation Safety Authority*	1	Maximise aviation safety through a regulatory regime, detailed technical material on safety standards, comprehensive aviation industry oversight, risk analysis, industry consultation, education and training.

Infrastructure, Transport, Regional Development and Communications		
Entity	Outcome	Description
Infrastructure Australia*	1	Improve decision-making on matters relating to infrastructure; advise governments and others on matters relating to infrastructure, including better assessment of infrastructure needs and prioritisation of infrastructure projects; and promote best practice infrastructure planning, financing, delivery and operation.
National Film and Sound Archive of Australia*	1	Increased engagement with Australia's audiovisual culture past and present through developing, preserving, maintaining and promoting the national audiovisual collection of historic and cultural significance.
National Gallery of Australia*	1	Increased understanding, knowledge and enjoyment of the visual arts by providing access to, and information about, works of art locally, nationally and internationally.
National Library of Australia*	1	Enhanced learning, knowledge creation, enjoyment and understanding of Australian life and society by providing access to a national collection of library material.
National Museum of Australia*	1	Increased awareness and understanding of Australia's history and culture by managing the National Museum's collections and providing access through public programs and exhibitions.
National Portrait Gallery of Australia*	1	Enhanced understanding and appreciation of Australian identity, culture and diversity through portraiture by engaging the public in education programs and exhibitions, and by developing and preserving the national portrait collection.
National Transport Commission*	1	Improved transport productivity, efficiency, safety and environmental performance and regulatory efficiency in Australia through developing, monitoring and maintaining nationally consistent regulatory and operational arrangements relating to road, rail and intermodal transport.
Screen Australia*	1	Promote engaged audiences and support a creative, innovative and commercially sustainable screen industry through the funding and promotion of diverse Australian screen product.
Special Broadcasting Service Corporation*	1	Provide multilingual and multicultural services that inform, educate and entertain all Australians and in so doing reflect Australia's multicultural society.
Australian Communications and Media Authority	1	A communications and media environment that balances the needs of the industry and the Australian community through regulation, education and advice.
Australian Transport Safety Bureau	1	Improved transport safety in Australia including through: Independent 'no blame' investigation of transport accidents and other safety occurrences; safety data recording, analysis and research; and influencing safety action.
National Capital Authority	1	Manage the strategic planning, promotion and enhancement of Canberra as the National Capital for all Australians through the development and administration of the National Capital Plan, operation of the National Capital Exhibition, delivery of education and awareness programs and works to enhance the character of the National Capital.
National Faster Rail Agency	1	Improved rail infrastructure between our capital cities and their surrounding regional centres by providing coordination, strategic advice and the identification of investments that improve reliability and travel speeds.

Infrastructure, Transport, Regional Development and Communications		
Entity	Outcome	Description
North Queensland Water Infrastructure Authority	1	Progress the development of water resource projects in North Queensland, through strategic planning and coordination of information sharing among relevant regulatory authorities and stakeholders.

Prime Minister and Cabinet		
Entity	Outcome	Description
Department of the Prime Minister and Cabinet	1	Provide high quality policy advice and support to the Prime Minister, the Cabinet, Portfolio Ministers and Assistant Ministers including through the coordination of government activities, policy development and program delivery.
Aboriginal Hostels Limited#	1	Improved access to education, employment, health and other services for Aboriginal and Torres Strait Islander people travelling or relocating through the operation of temporary hostel accommodation services.
